### Environmental Permitting

Local site plan, conditional use, and subdivision reviews.

Water Supply permitting for development projects.

Vermont Wastewater System and Potable Water Supply Permit assistance and design of sewer pump stations and collections systems.

Assistance with Act 250/Land Use Permit application preparation and hearing presentations.

Mr. Henson has been a land surveyor and project manager with Lamoureux & Dickinson since 1988. He has been responsible for coordinating teams involved in field surveying and land record research, construction layout, design, analysis and permitting of various projects for L&D.

His work includes preparation of design plans, construction documents, assistance with local and state permit applications, and follow-up to obtain local, state and federal permits and approvals. His recent projects have included commercial and residential site plans and residential condominium projects.

He has concentrated in performing property surveys throughout Vermont and in the design and permitting of transportation paths projects throughout Vermont.
